Notes written from original; document scrap of paper (now in Green folder file. Post Hoc return forgery to Green Folder of original scrap note. (note the alteration of colour of wagon, and the impossible other than fraud forgery of knowing that the woman was a police woman, that fucking outright obviously could not be known dopey cunts unless you knew who was originally in the car, in order to replace with "police woman" who would not be in uniform in a surveillance passenger vehicle. *Errata*: if I recall, this was the night when I was picking up cigarette butts at Hornsby Westfield on the plastic grass of Florence Street, when I suspected that the unnaturally unusually tightly packed group of approximately 22 young men, all well casual neat and tidy clothes, hair-cuts grooming and appearances, in an unnatural tight dense packed group, (recalling the days AVH's) I asked at about 1950 "Are any of you guys Freemasons?" and two of the young men replied "No mate, we are not"

16/8/17 (am)

- "Driving mistake scarred dark green ford station wagon, driven by a police woman, who was following me, who consequently had a heart attack & died
- - (PM) [forgery alteration - should be PC or WAPC] sent emails "Is This Defamatory"

2003 - \$1200 spent on rice and shampoo. Then had to (instructed by AVHs) buy ice cream by asking at counter for refunds (swap the shampoo for cash to get the ice cream.

Eating out of bins.

Include "x-scripts involving Pam"

"Car Rego and address from 13 sept 2016 3am"

At approximately 3am on the 13th sept 2016 I heard that Pam was going to be raped and assaulted, so I drove there at approx 100km per hour in each street and sat out front of her house. Immediately as I turned the engine off, 3 cars arrived.

One pulled into a driveway 35m down the street the house number was 121 or 123 pam's street (for some reason my note said TA 121/123). I know this because it sat in the driveway for a while, and after I sat for about an hour or an hour and a half, I drove down to get its rego, and it had gone in/up the driveway behind fence gates and parked, so I couldn't get the rego. I think it was a morone red Corolla hatch.

The car that arrived immediately as I turned my engine off was a white Hyundai hatch/wagon BX66PD. The third car went 120m down the street and I couldn't see it properly

17th August 2018 0057 hours

Entered the Muriel St car park of Hornsby Westfield, and there were two vehicles parked in the southern bays opposite Extreme clean. One was a large SUV type white station wagon CHR047, possibly Nissan or Toyota, the other I didn't see properly, other than it being a two door sporty looking car, white also I think (but am unsure).

My suspicion was aroused because they both left the parking bays and exited onto Muriel street as I was collecting my ticket from the machine to enter the car park (going to Hobby sew to collect cigarette butts). The larger white SUV looked similar to a car that boxed me in last Sunday 12th when I was visiting the adult shop to return 2 DVD's as I stated I was going to (to try and get a result). The driver looked similar as well. Tall in the seat, very short balding hair, clean shaven, around 47 - 50 years old.(251218 before he got into his car I would estimate he was 192cm tall, medium build, neat casual clothes, possible blue jeans)

I have no problem with this if this is the bikies, and caused no problem the previous Sunday. But if I am supposed to behave in a requisite manner, then I would wish that they don't leave butt flag me down and say what I am supposed to comply with, or whatever purpose they have in being ahead of me and knowing where and when I will arrive at any particular location around any particular time. This forknowledge is how the alleged bikies got killed.
